EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Wheelington on 10/25/2006.

The application has been amended as follows:

On the last line of claim 1, "and silicon" has been replaced with --, silicon, and oxygen--.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or render obvious a process as called for in claim 1, for aromatization of alkanes to produce benzene toluene xylene, and byproducts of methane and ethane in the presence of a catalyst consists essentially of platinum deposited on an MFI zeolite consisting of aluminum, silicon and oxygen in the framework. The closest art Chu (4,891,463) discloses using a catalyst containing ZSM-5 zeolite and other metals such as platinum, zinc, rhenium. However, Chu's ZSM-5 requires the presence of gallium in the framework. Further, as declared by applicants, the use of platinum in the catalyst yield a higher yield of BTX and a higher conversion which can be considered to be unexpected results.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
